

# Pals Quilt Towers – Information Flyer

Shown at right: Two Quilt Towers using the Pals Hangers.

- Use Hangers at the top level only for hanging a quilt without a sleeve.
- Use the 2-tier effect, as shown here, for displaying several wall hangings.
- Hang two quilts back to back (requires extra Pals Hangers and S-Hooks)

The quilt and wall hangings clamp to the back of the Pals Hangers. The Pals Hangers rest on the flat S-Hook provided with each black plastic hub.

*The Pals Hangers are also versatile in the shop for hanging on the walls on two screws, or hanging with fishing line from the ceiling using our stainless steel ceiling clips. The clamps will even hold an unquilted top. Less ladder time!*

The two-tier hubs will accept either the Pals Hanger Or Expandable Rod shown below.

The Towers simply slide into bases for a friction fit.

Photo below: Use the Expandable Rod for hanging quilts with sleeves. Rod collapses to 4 feet in length and expands to 10 feet in length. Hooks onto hub. With guild attachment and extra expandable rods, display quilts back to back.

Case with 2 Towers & 1 Rod weighs 24 lbs.

- Guild or trade shows (quilts, backdrop or curtains)
- In-Store Display
- Class project.
- Models of upcoming classes for a “Meet the Teachers” event.
- Display a Customer’s quilt in store
